

Graph the following lines, through the given point using the given slope. *Label the y-intercept when possible*

1. slope = $\frac{1}{2}$ through (-2, -4)

2. slope = $\frac{2}{5}$ through (-1, 4)

3. slope = $-\frac{1}{3}$ through (2, 5)

4. slope = $-\frac{2}{7}$ through (-5, 3)

5. slope = $\frac{3}{4}$ through (-1, 0)

6. slope = $-\frac{5}{2}$ through (3, 6)

7. slope = $\frac{6}{5}$ through (-4, -3)

8. slope = $-\frac{1}{2}$ through (0, 0)

9. slope = $-\frac{7}{3}$ through (5, 4)

10. slope = 3 through (2, 0)

Graph the following lines, through the given point using the given slope. *Label the y-intercept when possible*

1. slope = $\frac{1}{2}$ through (-2, -4)

2. slope = $\frac{2}{5}$ through (-1, 4)

3. slope = $-\frac{1}{3}$ through (2, 5)

4. slope = $-\frac{2}{7}$ through (-5, 3)

5. slope = $\frac{3}{4}$ through (-1, 0)

6. slope = $-\frac{5}{2}$ through (3, 6)

7. slope = $\frac{6}{5}$ through (-4, -3)

8. slope = $-\frac{1}{2}$ through (0, 0)

9. slope = $-\frac{7}{3}$ through (5, 4)

10. slope = 3 through (2, 0)

Graph the following lines, through the given point using the given slope. *Label the y-intercept when possible*

1. slope = $\frac{1}{2}$ through (-2, -4)

2. slope = $\frac{2}{5}$ through (-1, 4)

3. slope = $-\frac{1}{3}$ through (2, 5)

4. slope = $-\frac{2}{7}$ through (-5, 3)

5. slope = $\frac{3}{4}$ through (-1, 0)

6. slope = $-\frac{5}{2}$ through (3, 6)

7. slope = $\frac{6}{5}$ through (-4, -3)

8. slope = $-\frac{1}{2}$ through (0, 0)

9. slope = $-\frac{7}{3}$ through (5, 4)

10. slope = 3 through (2, 0)
